HYPERAI
AI AS A SERVICE

AI TRAINING & FINE-TUNING

NVIDIA A100 Server · 80 GB

Ampere-class HBM2e bandwidth and NVLink-ready architecture — purpose-built for training workloads, on unmetered 10 Gbps in our Tier III+ Amsterdam datacenter.

TECHNICAL SPECIFICATIONS

Built for memory-hungry training

The NVIDIA A100 80GB delivers 1,935 GB/s of HBM2e memory bandwidth — more than double the throughput of GDDR-based GPUs — paired with native NVLink for multi-GPU scale-out. Mature, proven silicon for serious training and fine-tuning workloads.

GPU	NVIDIA A100 (Ampere) — 80 GB HBM2e, 1,935 GB/s bandwidth, NVLink
Processor	AMD EPYC 9535 (High-frequency Turin architecture)
Storage	NVMe SSD — 1 TB included, expandable
Network	10 Gbps vPort — unmetered (fair use applies)
Precision	FP64, TF32, BF16, FP16, INT8, INT4 — training & inference
Location	Tier III+ Datacenter, Amsterdam Region — Netherlands

CONFIGURATIONS & PRICING

Choose your tier

All tiers include the same NVIDIA A100 80 GB GPU. Scale your vCPU cores and system RAM by selecting the tier that fits your training workload.

Tier	vCPU Cores	System RAM	NVMe Storage	Monthly Price
Standard	12 Cores	128 GB	1 TB	**€1,000**
Balanced	16 Cores	192 GB	1 TB	**€1,200**
Performance	24 Cores	256 GB	1 TB	**€1,450**
Extreme	32 Cores	384 GB	1 TB	**€1,700**

UPGRADES, NETWORKING & SERVICES

Tailor your deployment

EXTRA NVMe STORAGE

€10 / month per 100 GB

Granular billing — expand storage as needed.

NETWORK & IPs

10 Gbps vPort — Unmetered

1× Public IPv4 included

Free IPv6 /64 on request

Additional IPv4: €2.50 / month

LOCATION

Amsterdam · Netherlands

Tier III+ datacenter with redundant power and cooling.

BACKUP SERVICE

€35 / month — includes 250 GB storage

Retention: 7 daily · 4 weekly · 12 monthly · 5 yearly | Additional backup storage: €6 / month per 100 GB

All pricing excludes VAT.
